

Inner flat emitter drip irrigation tape

Abbreviation : S-tape

Materials: PE

Products Introduction

The inner flat emitter drip irrigation tape is an integrated drip irrigation equipment that inserts a flat emitter in the inner wall of the tape. The water drop to the roots of the crops through the emitter orifice on the drip irrigation tape, to realize the water and fertilizer irrigation together and also precise irrigation. The emitter has a self-filtering window, which has good anti-clogging performance. The labyrinth flow channel has a pressure compensation effect. The distance between the emitters can be determined according to customer requirements.

Advantages:

1. The emitter has filter window with good anti-blocking ability. performance.
2. Turbulent flow channel design, uniform irrigation.
3. The emitter and pipe line have strong integrity.
4. Different emitters spacing, application range is wide.

Applicable conditions:

1. It is used to grow crops in greenhouses can reduce pests and diseases, save fertilizers and pesticides, and improve economic benefits.
2. Used for orchard irrigation, it can effectively increase yield, improve fruit quality, and effectively control weed growth.
3. It is suitable for various field crops such as cotton, Chinese herbal medicine, watermelon, field crops, etc.

Products Technical Date Sheet

Product Code	Thickness	Diameter	Emitter Spacing(cm)	Flow Rate	Working Pressure	Standard Packing
	mm	(mm)		(L/H)	(Bar)	(m/roll)
