

Stand Dripper

Abbreviation : SDR

Materials PP

Details:

Suitable for potted flowers, plants, lawns, agriculture, villas, and industrial irrigation.

Product features: easy installation, water-saving performance, 360-degree adjustable dripper! It has a long service life and is widely accepted by users.

feature:

Different heights of crops can be selected for different heights of rods, and water is inserted into the ground, so that the irrigation area is larger and the irrigation is more even.
