

Pressure Compensation Online Dripper

Abbreviation : PCD

Materials: POM

product description

Features

1. With the help of water flow pressure, the elastic silicone sheet can change the section of the water outlet, adjust the flow rate, and stabilize the water outlet.
2. The distance between the emitters can be adjusted arbitrarily according to the plant spacing.
3. High irrigation uniformity.
4. With automatic cleaning function.
5. Strong pressure compensation, especially suitable for undulating terrain, unbalanced system pressure and long capillary.
6. Anti-corrosion and ultraviolet rays of agricultural chemicals and fertilizers, long service lifeEspecially

suitable for the following situations:

1. The system pressure is unstable.
2. Need to increase the capillary length.
3. The terrain is complex.
4. The plot is irregular.
5. Crop cultivation is not standardized.

Code	Picture	Name	Flow rate (l/h)	Working Pressure	PC/bag	PC/CTN	Packing
PCD1001		pc dripper take apart	2L/H	0.5-4 bar	500	5000	50*40*40
PCD1002		pc dripper take apart	4L/H	0.5-4 bar	500	5000	50*40*40
PCD1003		pc dripper take apart	8L/H	0.5-4 bar	500	5000	50*40*40
PCD1011		long pc dripper take apaty	2L/H	0.5-4 bar	500	5000	50*40*40
PCD1012		long pc dripper take apaty	4L/H	0.5-4 bar	500	5000	50*40*40
PCD1013		long pc dripper take apaty	8L/H	0.5-4 bar	500	5000	50*40*40
PCD1022		No apart dripper	4L/H	0.5-4 bar	500	5000	50*40*40
PCD1023		No apart dripper	8L/H	0.5-4 bar	500	5000	50*40*40
PCD1056		No apart dripper	4L/H	0.5-4 bar	500	5000	50*40*40
PCD1057		No apart dripper	8L/H	0.5-4 bar	500	5000	50*40*40
