

PE Pipe Compressed Fittings

Products introduction

The pipe fittings are made of polypropylene engineering plastics, which are non-toxic and tasteless, and conform to the GB4688 national hygiene standard. All adopt double-cone surface locking, and are equipped with anti-releasing ring to connect and fasten, which is convenient for installation. Normal service life is not less than 5 years

Features

1. Injection molding process, one-time molding, reasonable structure
2. High quality PP material, durable
3. No hot melt, easy to use
4. High temperature resistance, not afraid of freezing

Product application

It is suitable for the connection of PE pipes of various sizes.
